

Uploading a Shared Health Summary

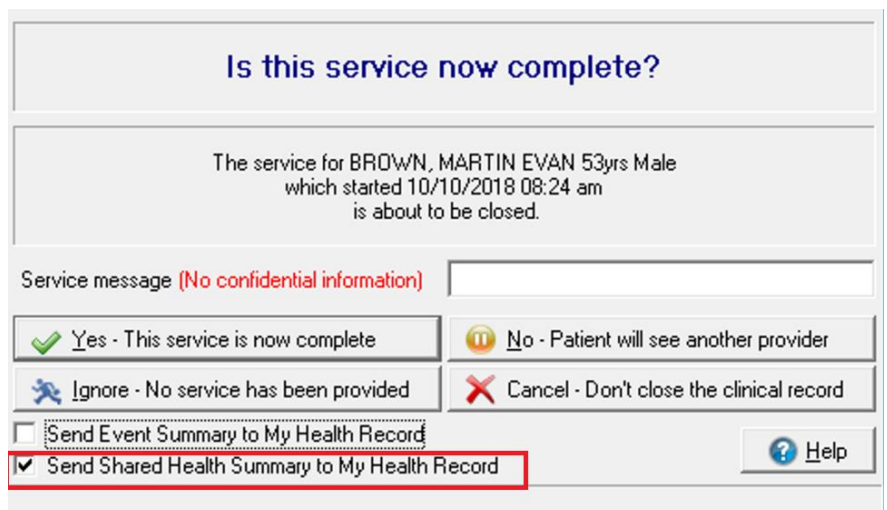

Note:

- These steps assume that your software is connected to the My Health Record system, the patient’s Individual Healthcare Identifier (IHI) has been validated in your system, and the patient has a My Health Record
- Before you begin, ensure that the patient’s clinical information in their local medical record is up to date.

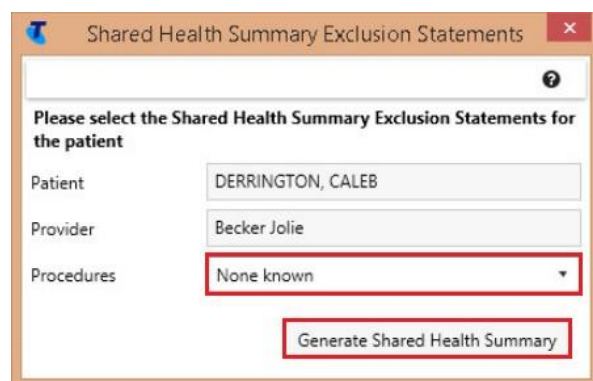

1. Select the **Open My Health Record** drop-down menu, then select **Generate a My Shared Health Summary**.

Alternatively, the following prompt will appear when exiting the patient’s local medical record. To send a shared health summary make sure the **Send Shared Health Summary to My Health Record** box is ticked, then complete service exit.

2. An **Exclusion Statement** will appear if information has not been recorded in the patient’s local medical record. Select **None Known** or **None Supplied** in the drop-down menu(s), then select **Generate Shared Health Summary**.

3. The shared health summary will auto-populate with information from the patient's local medical record. Tick/untick the items to include/not include in the shared health summary (right-side pane).

Attest to the statements at the bottom of the screen, then select **Save and Upload to My Health Record** (bottom-right corner).

Shared Health Summary
20 Mar 2017
CALEB DERRINGTON DoB 15 Jun 1933 (83y*) SEX Male IHI 8003 6080 0004 5922
