

View Pathology and Diagnostic Imaging (DI) Reports Overviews

The Pathology Reports Overview and Diagnostic Imaging Reports Overview bring together all test reports available in a My Health Record within a specified date range, with tests grouped by date, name and type. These Overviews allow you to quickly and easily find a specific report.

Note: These steps assume that your software is connected to the My Health Record system, the patient has a My Health Record and their Individual Healthcare Identifier (IHI) has been validated in your system.

1. To access the patient's My Health Record, select **Open My Health Record > View Health Record Overview** from the ribbon menu.

2. Scroll down and click on the **Patient Document List** shortcut button.

The "Diagnostic Imaging View" and the "Pathology Index View" also list reports but do not group and summarise results.

3. Click on **Pathology Overview** or **Diagnostic Imaging Overview** in the Documents list (they will always appear near the top of the list).

My Health Record Documents List			
Document Date	Service Date	Document	Organisation
18 Feb 2020		Diagnostic imaging overview	My Health Record
18 Feb 2020		Pathology Overview	My Health Record
18 Feb 2020		Medicines View	My Health Record

4. Navigating Pathology and DI Overviews:

Within the Overview, you will be able to navigate down or use hyperlinks to see information related to your patient's recent test history.

To access a report, click on the **hyperlink**.

Additional
information

5. If you **cannot see** a Pathology/DI report within an Overview, please note the following:

- An overview will only show reports within the date range filter in the Document list.
- If you don't select a date range, you will automatically see up to two years' worth of pathology reports and seven years' worth of DI reports.
- If your date range is too narrow, try expanding the date range in the Document list.

Other reasons why you may not see a report:

- Report links may be missing if there are too many reports for the system to display within your set date range, or if the report itself is too large. If this is the case, instructions will be provided to guide you to open the report.
- The reports may not have been uploaded to the patient's My Health Record.
- The reports may have been restricted from view by the patient or their representative.
