

How to prevent specific health information being uploaded to My Health Record

Note: A participating provider is authorised by law to upload health information about an individual to their My Health Record, unless the individual withdraws their consent or the information relates to a prescribed State or Territory law.

To prevent Shared Health Summaries or Event Summaries being uploaded

1. If your patient requests that no Shared Health Summaries or Event Summaries be uploaded to My Health Record by your practice, go to the *Consent* section (e.g. via patient demographic section). Tick **Consent for My Health Record**, indicate how the consent was provided, tick **Refused** and click **Save**. Once consent has been refused/withdrawn, MMEx will not allow access to My Health Record by users from the organisation.

Note

To request a pathology or diagnostic imaging report not be sent to My Health Record

1. To request a pathology or diagnostic imaging report not be uploaded to My Health Record, tick **Do not send reports to My Health Record**. This request will apply to all results on the request form. If you or your patient want other results in the form to be uploaded to My Health Record, a separate form may be used only for those results that your patient requests not be uploaded.

The screenshot shows a web form for requesting a pathology or diagnostic imaging report. At the top, there are four buttons: 'Save as Draft' (blue), 'Save and Complete' (green), 'Send and Complete' (green), and 'Print and Complete' (green). Below these are three input fields: 'Request Date' (with a calendar icon and the value '26/11/2018'), 'Lab' (a dropdown menu with 'QML Pathology With Label' selected), and 'Referred By' (with the value 'Ms MMEx Light Training'). Below the 'Lab' field is a link for 'Additional Information'. Below the 'Request Date' field is a 'Copy To' search box. Below the 'Referred By' field is a section for 'My Health Record' with a checkbox labeled 'Do not send reports to My Health Record' which is checked and highlighted with a red box.
